

Irrigation Solenoid Valve

BBV-MF Series of solenoid valve is a simple, compact and lightweight design, made up of Fiber-Glass reinforced material. It allows maximum dependability at a minimum level of maintenance, while yielding optimal irrigation operation.

Features

- Works with low water pressure.
- Very low operating current.
- DC powered and no risk of electrical shocking.
- Manual On/Off control incase of power outages
- Adjustable Flow Rate
- Inline, simple to install and maintain.
- Corrosion resistant high-quality material.

Applications

- Irrigation Systems
- Garden and Landscape.
- Sprinkler Systems
- Green Houses

Port Size	Model Number
3/4" (DN20)	BBV-FM-020
1" (DN25)	BBV-FM-025

Valve Specification	
Rated Voltage	DC 24V (<250 mA)
Max. Pressure	10 bar (145 PSI)
Port Connection	BSP, Female Thread In/Out
Type	Normally Closed
Max. Temperature	60°C
Body Material	Glass-fiber Reinforced
Environment	IP00/65

BOTBERRY SOLUTIONS LLP is a new Era company offers AI/ML based Smart Automation and Robotic solution for precision Farming, Garden, and Industrial needs by unifying IoT, Cloud and Communication(5G/BLE/LORA/NB-IoT) technologies
